The DGI Difference

Print and design is what we do.

DGI has over 25 years of experience producing signage and decals for top retailers and fortune 500 companies. We are a 3M Authorized Scotchprint manufacturer and a G7 Certified Master Color printer. Our R&D team carefully chooses our materials and tests them in the field to be sure they meet our client's expectations. Our creative designers will customize any signage with your corporate colors, logo or offer a custom design and our sales team will offer cost effective sizing and quantity price breaks for your project.

Email us to experience the DGI Difference. healthy@dgicommunications.com

FLOOR GRAPHICS

Considerations should be made for floor graphics and the surface they will be applied to. We offer several options including an all in one vinyl that works on smooth indoor floors or low pile carpet, this is the best option when you don't know what surface you are applying to. We also have floor decals for very specific surfaces as well as an outdoor option. Communicating with our Sales Team on where your floor decals will be applied is important to ensure the best material is used for your application.

Types of Floors

Indoor Smooth Floor: Linoleum, vinyl, tile, wood, indoor sealed concrete, marble. When possible recommend floor is stripped to remove wax, install graphics, reapply wax on top of graphics.

Low Pile Carpet: Carpet needs to be firmly attached, level low piles. The carpet must be clean and completely dry. No recent steam cleaning, and once installed steam cleaning not advised, and avoid vacuuming over edges as lifting may occur.

Exterior Placement: Concrete and asphalt. Surface must be clean, dry and free of debris or residues.

HINTS: When designing your floor decals stay away from sharp corners & angles as corners and sharp angles will tend to lift. Avoid intricate cutting patterns, rounded corners, circle shapes are most successful. Our Floor Decals are easily removable up to 3 months, adhesion may increase over time.
